About the Series

Activity Book presents 'the preschool readiness books' to tickle the toddlers. Our simple philosophy is that learning is most effective when fun becomes the pedagogy. The need of hours is to motivate our children to become independent and innovative thinkers.

The first six years of life are critical years of human life since the rate of development in these years is more rapid than at any other stage. By the age of 6, the brain development is 80 to 90 % complete.

We are introducing a series with whole brain development approach. This series has been developed in consultation with leading experts in the teaching of preschool and kindergarten. The curriculum has been taught and reinforced through activities. We have faith that this offering will serve and add value to the nurturing classroom of your school.

Lively pictures, beautiful designing and fabulous illustration makes these books extraordinary. They will build the confidence of beginners, and to motivate and inspire tender hearts who find learning difficult and dull.
